Sliding Panels System

Sliding Panels System is designed to cover large windows and to separate spaces in both residential and commercial environments. It works with 2, 3, 4 or 5 channels and with cord, wand or motor operation modes.

Sliding Panels System's stylish design hides the mechanism, creating a uniform aesthetic. It also eliminates the light gap almost completely. The fabrication and installation of the rails is simple. Additionally, head rail "splicing" is available for very wide applications and shipping.

Sliding Panels System has plastic components made of "POM" to reduce the drag and friction of the panels, resulting in better sliding and less noise.

Sheerview

ARTISAN
For Your Life

SHEERVIEW PRODUCT SPECIFICATIONS

Your product comes standard with the headrail wrapped in a color matching material, unless otherwise specified.

Optional  UPGRADE

Fabric Covered Headrail

Headrail

PATENT PENDING

The improved Headrail design wrapped in color matching fabric provides a unique statement in your home or office.

Cord-Loop Tensioner

The continuous cord-loop enables ease of use of the Sheerview Shade. The Window Covering Safety Council (WCSC) suggests that the Cord Tensioner device be permanently anchored to the window jamb, wall or floor.

Cord-Loop Tensioner

Brackets

Easy to install
One Clip Brackets, come with shims to even the shade if the window jamb is uneven.

Stoppers

PATENT PENDING

Prevents the bottom-rail from looping up into the headrail when raised up, or with motorization.

Bottom-Rail

PATENT PENDING

Bottom-Rail features an improved design that enables you to experience less light gap when the Sheerview Shade is in the lowered/closed position.

Prices are subject to change without notice

Note: Adjustable counter weight keeps sheer shade level.
